Report profile

Data collection

The data on the products’ environmental performance is based on measured test results. Performance data on the environmental and social aspects of sustainability has been collected from the Wärtsilä companies using a detailed questionnaire. Economic performance data is based mainly on audited financial accounts.

The sustainability data is collected and reported according to Wärtsilä’s specific internal reporting guidelines that include all the definitions and instructions necessary for this purpose. Environmental expenditure and investments are reported applying the Eurostat instructions.

Each company has a nominated individual responsible for collection and consolidation of the data, and for its quality and reliability. The management of each company approves the data before it is consolidated at the Group level. The companies report their sustainability data using Wärtsilä’s sustainability reporting system. The reported data is checked at both local and Group levels before its consolidation. The content of this Sustainability Report was reviewed and approved by Wärtsilä’s Board of Management.

Report assurance

DNV GL Business Assurance Finland Oy Ab (DNV GL) has independently assessed the report against GRI Standards (2016). As part of the assurance process, DNV GL assesses local level data management and processes, evaluates the relevance and reliability of the data reported to headquarters, and assesses whether the reporting guidelines of Wärtsilä are well understood and applied. This is achieved through conducting site visits and videoconferencing. Site visit was carried out in Vaasa, Finland. Wärtsilä Voyage, Wärtsilä Indonesia, Wärtsilä North America, Wärtsilä Iberica and Wärtsilä Japan were assessed through videoconferencing.
